

MARWAN GHAZAL

416 - 830 - 7659 | marwanghaazal@gmail.com | linkedin.com/in/marwanghazal | github.com/marghazal

EDUCATION

University of Guelph, Guelph, Ontario

Sep 2025 — Present

Bachelor of Computing in Software Engineering, Co-op

SKILLS

Programming Languages: JavaScript, Python, C, HTML, CSS

Frameworks & Libraries: React, Next.js, Node.js

Developer Tools: Git, GitHub, VS Code, Chrome DevTools, npm, Terminal, Figma, Replit, Linux

PROJECTS

RankedIn | Next.js, React, OpenAI Codex API, REST APIs, Supabase

May 2026 — May 2026

- Built a full-stack web app that compares LinkedIn profiles and generates a head-to-head ranking score using scraped profile data.
- Used Supabase to store and query user data, with AI-powered profile analysis supported by the OpenAI API.
- Designed a clean, responsive React interface with reusable components, earning Best UI recognition from industry judges.
- Shipped a polished working prototype in 24 hours with a 2-person team, placing 2nd overall at the GDG Hackathon.

Personal Portfolio Website | HTML, CSS, JavaScript

Jan 2026 — Feb 2026

- Designed and developed a personal portfolio site from scratch to showcase projects, skills, and background to recruiters and co-op employers.
- Built fully responsive layouts optimized for both desktop and mobile, ensuring consistent presentation across all screen sizes.
- Organized project sections and external links to support co-op and networking outreach.

OmniAI | Next.js, React, TypeScript, Tailwind CSS, OpenRouter API

May 2026 — Present

- Developing a multi-model AI platform that centralizes popular AI tools into a single workspace for productivity, coding assistance, and workflow optimization.
- Engineering reusable frontend components and backend API integrations to support dynamic model selection and scalable application structure.
- Implementing responsive UI/UX principles and modular system design to improve usability and maintainability.
- Building the platform with a focus on performance, extensibility, and real-world developer workflows.

EXPERIENCE

Freelance Web Developer

Jan 2025 — Present

- Contracted to build websites for small business clients, delivering responsive and visually polished sites tailored to each client's goals.
- Managed end-to-end client communication — gathering requirements, iterating on feedback, and handling deployment.
- Gained hands-on experience with real-world constraints including deadlines, revision cycles, and live site maintenance.

Web Development Intern

Apr 2026 — Jun 2024

RSG Group

- Maintained and enhanced the company website by updating content, improving page layouts, and refining the overall user experience.
 - Built and modified website sections to better present company information and support business needs.
 - Applied feedback from stakeholders through revision cycles, ensuring updates were accurate, responsive, and visually consistent.
 - Performed basic testing across devices and browsers to identify layout issues and improve site reliability.

AWARDS & HONORS

Google Developer Hackathon - 2nd Place, Best UI

May 2025

Recognized for designing and building RankedIn, an AI-powered LinkedIn profile comparison platform.
